

Writing Scientific Papers

Wednesday, November 4, 2009
3:00-4:30pm
126 Voorhies

Writing scientific papers requires the ability to successfully communicate the results of your work. The quality of your research may be judged on your ability to organize this information in the form of a scientific paper. Fortunately, scientific papers usually follow a very consistent format of introduction, methods, results, and discussion. Our workshop leader will help you learn effective techniques to enable you write up your research with concision and clarity, and then get your paper published in a peer-reviewed journal.

Workshop Leader: Sarah Perrault, Ph.D., University Writing Program

*This workshop is part of the **Professional Development Series***
